ABOUT ME

Site Reliability Engineer with 7+ years in banking infrastructure at PT Bank SMBC Indonesia. Specialized in building observability pipelines (Grafana, ELK Stack, SolarWinds) and automation that significantly reduces operational toil. Progressed from L1 incident response to leading the Octopus Squad SRE Task Force, delivering zero SLA breaches across all P1 incidents in 2024. Currently expanding into cloud and AI through Microsoft Azure and Fabric certifications from Dicoding Indonesia.

KEY ACHIEVEMENTS

- Zero P1 SLA breaches in 2024 — MTTR consistently under 30 minutes across all critical incidents
- Reduced operational toil by ~40% through Python/Bash automation and proactive detection scripts
- Cut monitoring deployment effort by ~60% via Jenkins CI/CD pipelines for configuration management
- Resolved 50+ recurring production issues through deep-dive root cause analysis, improving system stability

WORK EXPERIENCE

IT Monitoring & Service Recovery Engineer | PT Bank SMBC Indonesia Tbk

May 2024 – Present Octopus Squad – SRE Task Force

- Built an end-to-end observability stack using SolarWinds, Elasticsearch, and Grafana real-time visibility across 100+ servers and business critical banking apps.
- Automated monitoring config deployments through Jenkins CI/CD pipelines, cutting manual deployment effort by ~60% while keeping changes consistent and version-controlled.
- Wrote Python and Bash detection scripts that reduced mean-time-to-detect (MTTD) by ~40%, shifting the team from reactive firefighting to catching issues before they escalate.
- Built Tableau dashboards for capacity planning, giving management clear visibility into resource utilization and production trends.
- Led technical response during P1 incidents, hitting MTTR under 30 minutes with zero SLA breaches across all critical incidents in 2024.

Impact: Cut operational toil by ~40% through automation. Zero SLA breaches in 2024 across all P1 incidents.

IT Production Support L2 | PT Bank SMBC Indonesia Tbk

Aug 2020 – Present

- Handled complex incident and problem tickets in ServiceNow and Jira ran root cause analysis on app logs for 50+ recurring production issues.
- Diagnosed and resolved system issues through deep troubleshooting and log analysis, documenting each fix in Confluence to build a reusable knowledge base.
- Worked closely with Business Analysts, QA teams, and vendors to catch problems before production; was involved in UAT cycles too.
- Monitored system integrations across Grafana, ELK, API logs, and middleware platforms proactively surfacing errors before they hit end users.
- Ran advanced SQL queries for data fixes, issue diagnosis, and technical reporting to business stakeholders.

- Administered AS400 Core Banking systems and maintained documentation in Confluence/Jira.
- Part of the 24/7 on-call rotation for critical incidents and emergency response in banking operations.

Impact: Resolved 50+ recurring production issues through deep-dive root cause analysis, reducing repeat incidents and improving overall system stability.

IT Production Support L1 | PT Bank SMBC Indonesia Tbk

Aug 2018 – Aug 2020

- Handled first-line incident response — service restarts, error log checks, and initial triage for production alerts.
- Supported the ITCCMS system to verify ATM card linkages and ensure backend data accuracy for card operations.

CERTIFICATIONS

- Applied Data Science with Microsoft Fabric — Dicoding Indonesia, 2025
- Generative AI Application Development with Microsoft Azure — Dicoding Indonesia, 2025
- Data Processing Fundamentals — Dicoding Indonesia, 2025
- Machine Learning for Beginners — Dicoding Indonesia, 2025
- Fundamentals of Structured Query Language (SQL) — Dicoding Indonesia, 2025
- Fundamentals of Artificial Intelligence (AI) — Dicoding Indonesia, 2025
- Fundamentals of Data Science — Dicoding Indonesia, 2025

TECHNICAL SKILLS

Monitoring	Grafana, SolarWinds, Elasticsearch / ELK Stack, Tableau
DevOps / CI/CD	Jenkins, Git
Programming	Python, Bash, SQL
Cloud & Data	Microsoft Azure, Microsoft Fabric, Azure AI
Infrastructure	Linux, AS400 Core Banking, Windows Server, Oracle, SQL Server
Incident Mgmt	ServiceNow, Jira, Confluence, Root Cause Analysis (RCA)
Testing & API	Postman, API Log Analysis, Middleware Monitoring

EDUCATION

Bachelor of Information Systems — Nusa Mandiri University

Graduated 2021 • GPA: 3.28 / 4.00

Diploma of Management Information Systems — Bina Sarana Informatika University

Graduated 2016 • GPA: 3.23 / 4.00
