

# HENDRA PRASETYO

Site Reliability Engineer | Infrastructure & Observability Specialist

📍 Depok, Indonesia ✉️ [hendraprasetyo94@gmail.com](mailto:hendraprasetyo94@gmail.com) ☎️ +6289653917925 🔗 LinkedIn: [Hendra Prasetyo](#) 🌐 [Portfolio Website](#)

## PROFESSIONAL SUMMARY

SRE Engineer with 7+ years in banking infrastructure at PT Bank SMBC Indonesia, specializing in end-to-end observability pipelines (Grafana, ELK Stack, SolarWinds) and automation that measurably reduces operational toil. Progressed from L1 incident response to leading the Octopus Squad SRE Task Force, where I designed Jenkins CI/CD pipelines for monitoring deployments, developed Python/Bash automation for anomaly detection, and maintained strict banking SLAs through proactive incident management. Actively expanding into cloud and AI technologies with Microsoft Azure and Fabric certifications.

## PROFESSIONAL EXPERIENCE

### IT Monitoring & Service Recovery Engineer | PT Bank SMBC Indonesia Tbk May 2024 – Present

#### Octopus Squad – SRE Task Force

- Designed end-to-end observability stack using SolarWinds, Elasticsearch, and Grafana, providing real-time visibility across 100+ servers and business-critical banking applications.
- Automated monitoring configuration deployments via Jenkins CI/CD pipelines, reducing manual deployment effort by ~60% and ensuring consistent, version-controlled infrastructure changes.
- Developed Python and Bash automation scripts for proactive anomaly detection, cutting mean-time-to-detect (MTTD) by approximately 40% and significantly reducing on-call toil.
- Built Tableau dashboards for infrastructure capacity planning, enabling data-driven decisions for management on resource allocation across production systems.
- Led technical coordination during P1 incidents, achieving service restoration within banking SLA targets (MTTR < 30 minutes) with zero SLA breach in 2024.

🔴 **Impact:** Reduced operational toil by ~40% through automation. Zero SLA breach in 2024 across all P1 incidents.

### IT Production Support L2 | PT Bank SMBC Indonesia Tbk Aug 2020 – Present

- Managed complex incident and problem tickets via ServiceNow and Jira, performing root cause analysis (RCA) on application logs for 50+ recurring production issues.
- Investigated and resolved system issues through in-depth troubleshooting, bug analysis, and quick workaround deployment; delivered clear technical documentation for all fixes.
- Coordinated closely with Business Analysts, QA teams, and vendors to address application problems before production deployment, supporting full SDLC practices including UAT.
- Monitored system integrations using Grafana, Elastic (ELK), API logs, and middleware platforms to detect and act on system errors proactively.
- Executed advanced SQL queries for data remediation, issue diagnosis, and technical reporting for business stakeholders.
- Administered AS400 Core Banking systems and documented resolutions in Confluence/Jira to build team knowledge base.
- Participated in 24/7 on-call rotation to support critical incident handling and emergency response for banking operations.

🔴 **Impact:** Resolved 50+ recurring production issues through deep-dive RCA, improving system stability and reducing repeat incidents.

**IT Production Support L1** | PT Bank SMBC Indonesia Tbk Aug 2018 – Aug 2020

- ▶ Handled first-line incident response including service restarts, error log analysis, and initial triage for production alerts.
- ▶ Supported ITCCMS system to verify ATM card linkages and ensure backend data accuracy for card operations.

**TECHNICAL SKILLS**

|                            |                                                                              |
|----------------------------|------------------------------------------------------------------------------|
| Monitoring & Observability | Grafana, SolarWinds, Elasticsearch / ELK Stack, Tableau                      |
| DevOps & CI/CD             | Jenkins, Git                                                                 |
| Languages & Scripting      | Python, Bash, SQL                                                            |
| Cloud & Data Platform      | Microsoft Azure, Microsoft Fabric, Azure AI                                  |
| Infrastructure & OS        | Linux Administration, AS400 Core Banking, Windows Server, Oracle, SQL Server |
| Incident Management        | ServiceNow, Jira, Confluence, Root Cause Analysis (RCA)                      |
| API & Testing Tools        | Postman, API Log Analysis, Middleware Monitoring                             |

**CERTIFICATIONS**

**Featured (Microsoft Certified)**

- ▶ **Microsoft Certified: Fabric Analytics Engineer Associate — Dicoding Indonesia, 2026**
- ▶ **Microsoft Certified: Azure AI Fundamentals — Dicoding Indonesia, 2026**

**Additional Certifications (2025–2026)**

- ▶ Applied Data Science with Microsoft Fabric | Generative AI Application Development with Microsoft Azure | Data Processing Fundamentals | Machine Learning for Beginners | Python Programming Fundamentals | SQL Fundamentals | Fundamentals of Data Science | Fundamentals of AI — Dicoding Indonesia
- ▶ Discover AI in Daily Life — Google, 2025

**EDUCATION**

**Bachelor of Information Systems***Graduated 2021*

Nusa Mandiri University — GPA: 3.28 / 4.00

**Diploma of Management Information Systems***Graduated 2016*

Bina Sarana Informatika University — GPA: 3.23 / 4.00

**ADDITIONAL INFORMATION**

- ▶ Languages: Indonesian (Native), English (Professional Working Proficiency)
- ▶ Portfolio: Built a personal SRE portfolio website (React + TypeScript) showcasing live infrastructure monitoring demos, case studies, and project highlights — demonstrating hands-on frontend and systems thinking beyond day-to-day ops work.
- ▶ Focus: Bridging legacy banking systems (AS400) with modern observability stacks and cloud AI technologies to achieve optimal system stability and performance.
